Panel Discussion

“Building Awareness and Financing of the Energy Efficiency Projects in Day to Day Business Activities”

Panel Session:

Building Awareness and Financing of the Energy Efficiency Projects in Day to Day Business Activities

Main objectives:

- Regulatory or institutional frameworks for the deployment for energy efficiency in the region
- Particular countries that stand out in this regard currently
- Major obstacles impeding this process
- Interlinking of regulatory, institutional and financing mechanisms and whether a wider deployment can occur even if financing is not readily available
- Role that the private sector in the overall equation in order to achieve success

Dr. Bodo Goerlich

- **President of (GPPCI) German Philippine Chamber of Commerce & Industry**
- Dr. Goerlich started his career as Assistant Professor at the RWTH Aachen University in North Rhine-Westphalia, Germany, where he also obtained his Doctorate Degree in Engineering. A mining engineer by profession, he also had several stints in various mining companies like Bergbau AG Niederrhein and Ruhrkohle AG where he served in various capacities ranging from Planning Engineer to Division Manager and Department Head.

Mr. Oscarlito C. Malvar

- **National Project Coordinator, Industrial Energy Efficiency Project**

Oscarlito has more than 20 years professional experience in SE Asia working on energy issues related to clean energy with public and private sectors with proven analytical skills in conducting research, analyses, sustainable energy management systems, energy audits of electrical systems and thermal systems, environmental impact and risk assessments.

Mr. William Trant Beloe

- **Asia Head of Climate Finance**

Will leads the work IFC does with Financial Institutions on Low Carbon Finance for Asia.

Previously based in Delhi, he was IFC's Sustainable Business Advisory Lead for South Asia. Prior to that, Will was the Head of Advisory Services for IFC Philippines and the EAP regional product lead covering Sustainable Energy Finance and various other climate change initiatives.
