Panel Discussion

Sustainable Supply Chain

Panel Session:

From the private sector perspective, logistics industry will be one of the key highlights especially in view of the ASEAN Economic Community (AEC) 2015.

Travel of goods will be more rampant and we deep dive into how companies are doing their part in ensuring responsible logistics.

Mr. Jaya Moorthi Pillai, Director of Logistics, Hewlett Packard Asia Pacific

- Supply Chain professional with broad background in logistics operations, warehousing, postponement, reverse logistics, environment/recycling logistics, international freight, transportation, customs operations, strategic procurement and a host of others. Accountable for strategic planning, network mapping and capability roadmap for Asia operations.
- Prior to current role, he was with Port of Singapore Authority executing vessel planning and operations.
- Was voted Supply Chain Professional (Hi Tech) 2014 by Supply Chain Asia

Mr. Stephan Schablinski, CEO of Green Freight Asia Network Ltd

- Director Sustainable Supply Chain Solutions at DHL Supply Chain Singapore Pte. Ltd. and Chief Executive Office of Green Freight Asia Network Limited, a not for profit organization, incorporated in Singapore.
- Stephan is leading a collaboration between DHL and the Singapore Management University, called the Green Transformation Lab, which focuses on education, research and best practice development towards sustainable green growth and drive change in supply chains.
- Stephan's recent achievements in the sustainability arena include contributing to carbon accounting standards developed by World Economic Forum (WEF), World Business Council for Sustainable Development (WBCSD), World Resources Institute (WRI), and the Green Freight programs in Europe and Asia, and developing Green Solutions for the logistics industry.
