10th ADB Asia Clean Energy Forum Deep Dive Workshop

PANEL DISCUSSION:

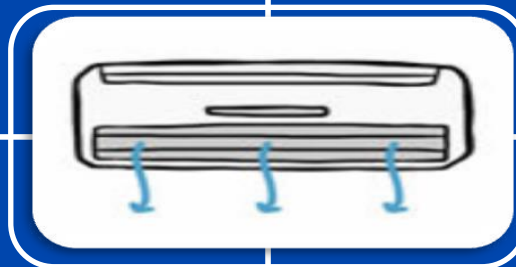

**How to Identify Energy Conservation
Opportunities**

TYPICAL BUILDING ENERGY PROFILE

Myth: Leaving AC on overnight reduces energy costs

Result: Energy use increase of more than 250 per cent above normal operation hours.

Reality: It only takes a fraction of energy to bring space to set temperature at 7am compared with the energy to keep the space cool overnight.

Action: Turn manually controlled systems such as split systems off before leaving the office at the end of each day.

JEC Philippines
Ms Sheena Bata

- Registered Electrical Engr.
- Certified BERDE by PH Green Building Council
- 7 years experience in M&E equipments for BPO, manufacturers and buildings.

Limketkai
Manufacturing Corp.
Mr. Marionel Peralta

- BS Mechanical Engineering
- National Expert, UNIDO/DOE ISO 50001 Energy Mgt.
- Senior Consultant in multiple fields like ISO, IT, BMS, etc

Pag ASA Steel
Mr. Howard Tong
