

WHAT is Energy Excelsator

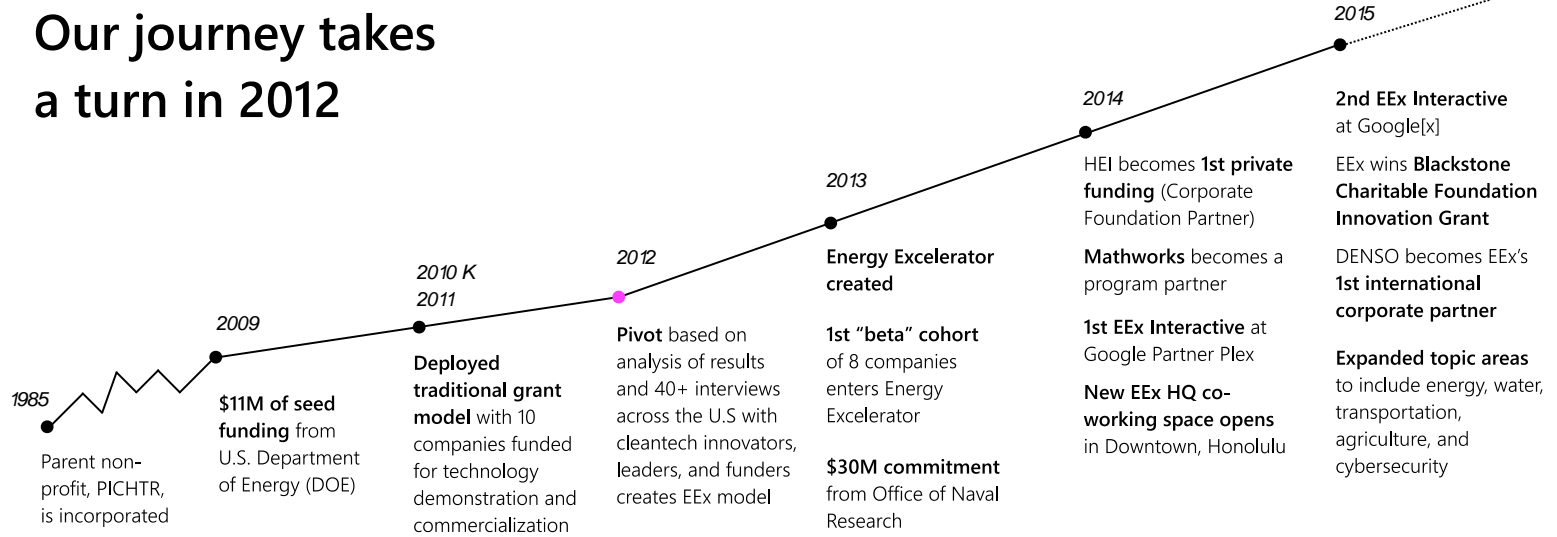

Our mission is to solve the worlds energy challenges through innovation.

We invest in entrepreneurs who are creating next-generation hardware, software and business models to accelerate our path to 100% renewable energy.

Dawn Lippert kicks off Energy Excelsator Interactive 2016 at X (formerly Google[x])

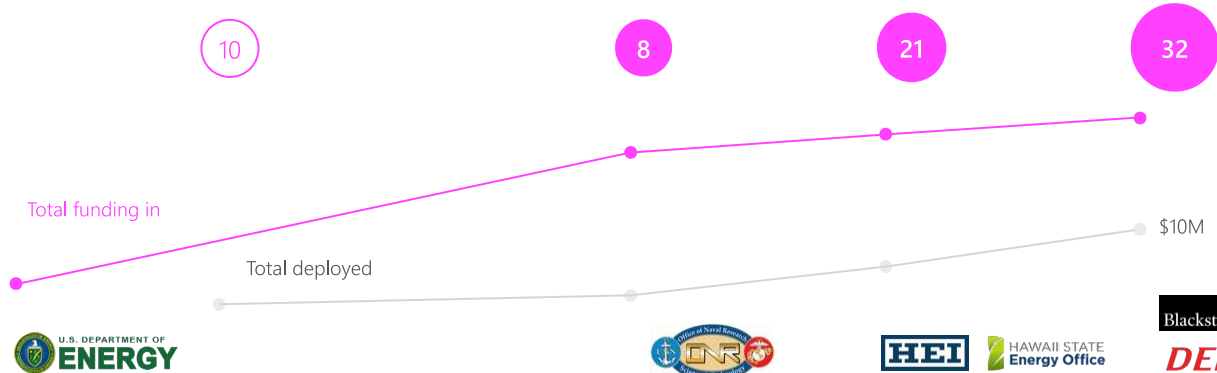

Our journey takes a turn in 2012

Grew our portfolio of companies

Grew our funding pool and partners

Our Portfolio is Transforming Industries

HOW Does it Work

Up to \$1M funding - We have developed an international accelerator program that provides up to \$1 million of funding per technology startup.

1-6% equity for services - We provide services such as executive coaching, mentorship, curriculum, peer-to-peer learning and a vibrant ecosystem to fast-track a startups path to success.

5% acceptance rate - We are highly selective – we receive over 300 applications every year and choose approximately 15 startups to be a part of our program.

LESSONS Learned

Coming up with the next big idea is not enough – it requires meaningful relationships between stakeholders to fill the market with transformational solutions.

We have developed the Global Partner Program to facilitate these meaningful conversations.

Our ecosystem includes:

Fortune 500 companies

Financial institutions

Incubators & accelerators

Investors

Policy makers

Property owners

Subject matter experts

Universities
