

EU – Philippines Access to Sustainable Energy Programme

ASEP Call for Proposals (CfP)

**Promotion of excellence, learning and awareness
on SE4All and the SDG7**

Asia Clean Energy Forum ADB 05/ 06 /2018

Call for Proposals - Objectives

The **global objective** of this call for proposals is to generate more electricity from renewable energy, increase efficiency of energy use and increase access to affordable, disaster resilient energy for the poor.

The **specific objectives** of this call for proposals are:

- (1) to increase energy access and livelihood opportunities in the off-grid areas of the country, including the Autonomous Region in Muslim Mindanao (ARMM) through sustainable and innovative renewable energy solutions, and
- (2) to promote awareness, knowledge, learning and capacity on SE4All (Sustainable Energy for All).

Call for Proposals - Lot 4: Promotion of excellence, learning and awareness on SE4All and the SDG7 (3.2 M €)

The objective of this lot, is to increase the awareness and knowledge on rural electrification, energy efficiency and renewable energy, through the creation of a national Centre of Excellence for SE4All and SDG7.

Academic institutions, and where possible, in cooperation with affiliated energy centres, research or development entities, or a consortium of the foregoing are the expected applicants to this lot.

Preference will be given to actions that include partnerships with international, regional and/or European institutes that have developed similar experience.

Lot 4: Main activities expected

Activities include:

- (1) increasing general public awareness on the benefits of energy access, energy efficiency and renewable energy;
- (2) providing education and capacity building on SE4All and SDG7 to target beneficiaries, particularly government policy makers and regulators as well as project developers, service providers and financial institutions;
- (3) undertaking continuing research and dissemination, particularly on policies and technologies;
- (4) conducting national, local and community extension services

Awarded Proposal : "Clean Energy Living Laboratories (CELLSs): The development of centres of excellence on energy access, renewable energy, and energy efficiency"

- Three years program
- Implemented through collaborative arrangements with different universities and SEA entities
- Regional centres in Visayas and Mindanao

Constraints: contract has to be signed before the end of the year but a prior extension of the program has to be granted.

THANK YOU

Willy HICK
