

# The importance of Quality Infrastructure to Support Financing of PV projects

June, 2018

Susumu Yoneoka  
Energy Specialist (Smart Grids),  
Sustainable Development and Climate Change Department  
Asian Development Bank

# Outline

- Quality Infrastructure
- Quality Solar PV
- ADB ESG operations
- ADB Strategy 2030

# Quality Infrastructure

**MEETING ASIA'S INFRASTRUCTURE NEEDS**

Asian Development Bank 50th Anniversary

**This report examines developing Asia's infrastructure—defined as transport, power, telecommunications, water supply and sanitation. It looks at the region's investments in infrastructure, and what will be needed through 2030.**

[View on the Data Library »](#)

Developing Asia will need to invest \$1.7 trillion per year in infrastructure until 2030 to maintain its growth momentum, tackle poverty, and respond to climate change. The report examines how much the region has been investing in infrastructure and what will likely be needed through 2030. It also analyzes the challenges shaping future infrastructure investment and development.

examines the evolution of infrastructure, and the infrastructure investment, in middle-income countries.

nds that the provision of infrastructure varies across s of development and growth performance. Basic such as transport, water, and sanitation, are more during early stages of development, while infrastructure, such as power and specially information cation technology, become more important during later

# Quality Infrastructure

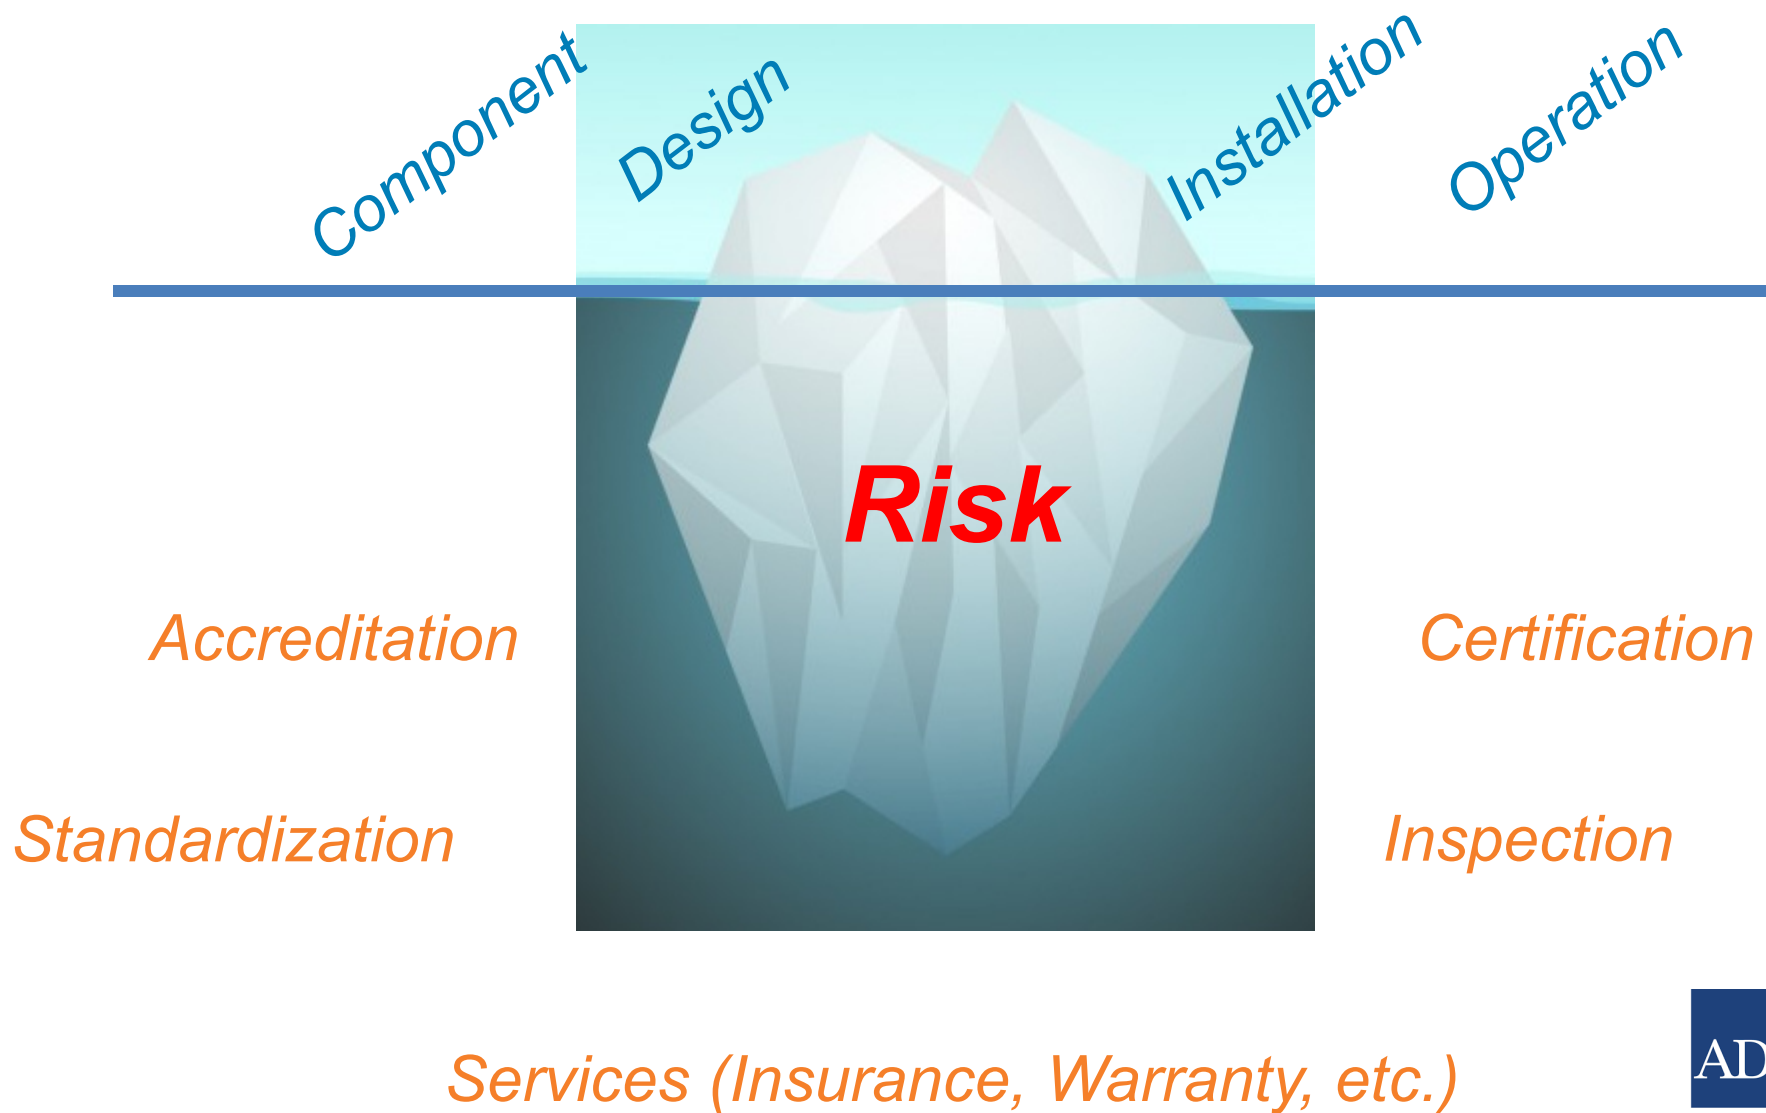

- Ensuring alignment with development strategies
- Application of high-quality standards
- Ensuring the quality of infrastructure
  - ✓ Economic efficiency
  - ✓ Inclusiveness
  - ✓ Safety and resilience
  - ✓ Sustainability
  - ✓ Convenience and amenities
  - ✓ Contribution to the society and economy

# Quality Solar PV

# Quality Solar PV

# ADB Energy Sector Operations

- ADB Energy policy; 3 Pillars
  - Promoting energy efficiency and renewable energy
  - Maximizing access to energy
  - Promoting energy sector reform, capacity building and good governance
- Climate Financing; provide USD 3 billion per year by 2020 for clean energy
- Technical assistances (TA);
  - Floating solar, Solar-based micro/mini grids, etc.
- Fund mobilization
- Partnership

# Technology Perspective

- Hybrid System
- Microgrids 
- Efficient Generation
- Advanced T&D
- Energy Efficiency

- Networked Microgrids
- Energy Management System
- Distributed Energy Resources
- Direct Current System 
- Energy Efficiency
- Demand Response
