

## Speakers

Alfredo Baño is an evaluation specialist at the Independent Evaluation Department of the Asian Development Bank, where he evaluates projects, programs and policies in the energy sector. He has 15 years of experience working on energy and infrastructures sectors in Europe and Asia. Before joining ADB, he worked for the International Atomic Energy Agency, he consulted for the World Bank and ADB in energy sector operations and worked for an engineering consulting firm in Spain. He is an electromechanical engineer, with majors in electricity generation and power systems, and holds an MBA in Corporate Finance from the IE Business School.

Thomas Dreessen is a globally-recognized energy efficiency (EE) and Energy Services Company (ESCO) expert with over 35 years of experience in developing, financing and/or implementing EE projects and delivering related capacity building programs in over 25 countries. He has lived in Indonesia since 2012 and worked on various consulting assignments to develop/finance EE projects, develop the ESCO market and provide capacity building to hundreds of consultants, ESCOs, bankers and government officials. He has created new debt and credit enhancement products to scale up the financing of EE projects that include: i) savings-based loans, ii) Energy Savings Insurance and iii) use of Special Purpose Vehicles to aggregate EE projects to reduce risks and transaction costs, and increase investor IRR. He is a past Chair and long-standing member of EVO's Board and Executive Committee. He holds a BBA in Accounting, MBA in General Business, and is a Certified Public Accountant.

Mark Lister is Managing Partner of Asia Clean Energy Partners, an international consulting and advisory firm working to support accelerated clean energy deployment with a focus on markets in Asia and the Pacific. Mark is a leading advocate for expanded energy efficiency deployment, with 20 years of experience in clean energy across a range of sectors. He has been involved with industry advocacy in Australia, worked on grassroots solar projects in sub-Saharan Africa, and lectured in postgraduate sustainable energy courses. After a stint with ADB in the Philippines working to facilitate and scale up climate technology investments in Asia-Pacific, Mark was in Denmark and led the Copenhagen Centre on Energy Efficiency, the global hub of Sustainable Energy for All that aims to double the rate of global energy efficiency improvement by 2030. He became Chair of EVO in January 2020.
