

SmartPower
Myanmar

Energy Impact Fund

Enabling Energy Access
Ending Energy Poverty

- **60% of the community** gained access to a safe water supply
- Energy costs **down 60%**
- Labour productivity **doubled**
- Typical order sizes **up 50%**

The bigger picture

Across Myanmar, 50% of communities lack access to an affordable, reliable source of electricity.

This:

- » Prevents children from achieving their potential
- » Disproportionate impact on women
- » Inhibits economic growth

Communities are trapped in cycles of poverty.

The funding challenge

- **\$400** to connect to electricity
- **\$1,000** to purchase electric-powered equipment
- A significant **social return on investment**
