ABOUT THE ASIA CLEAN ENERGY COALITION

Private Sector-driven coalition of influential renewable **energy buyers that closely collaborate with energy sellers and financiers to strategically drive policy and regulation in key Asian national and regional markets.**

Focuses on **tracking and monitoring the policy and regulatory ecosystems to support governments** at national and regional levels to implement policy and regulatory changes for an enabling market for corporates' RE adoption and purchasing.

Unified corporate voice that drives market reforms and industry transformation to accelerate a just energy transition and decarbonization of the economy of the region to reduce carbon emissions to tackle climate change.

Promote clean energy investments to mobilize funding and help advance energy security and a just energy transition to help governments build healthier communities and create jobs.

Accelerating Power Grid Interconnectivity in Southeast Asia: A Private Sector Perspective

www.asiacleanenergycoalition.com

Benefits of ASEAN Power Grid (APG)

Building an integrated regional power system between ASEAN member states can **facilitate economic growth** for the region, and **enable businesses to cost-effectively procure reliable, clean electricity**.

Improved energy security and power system flexibility

Efficient regional trading and power procurement

Increased renewables integration into ASEAN markets

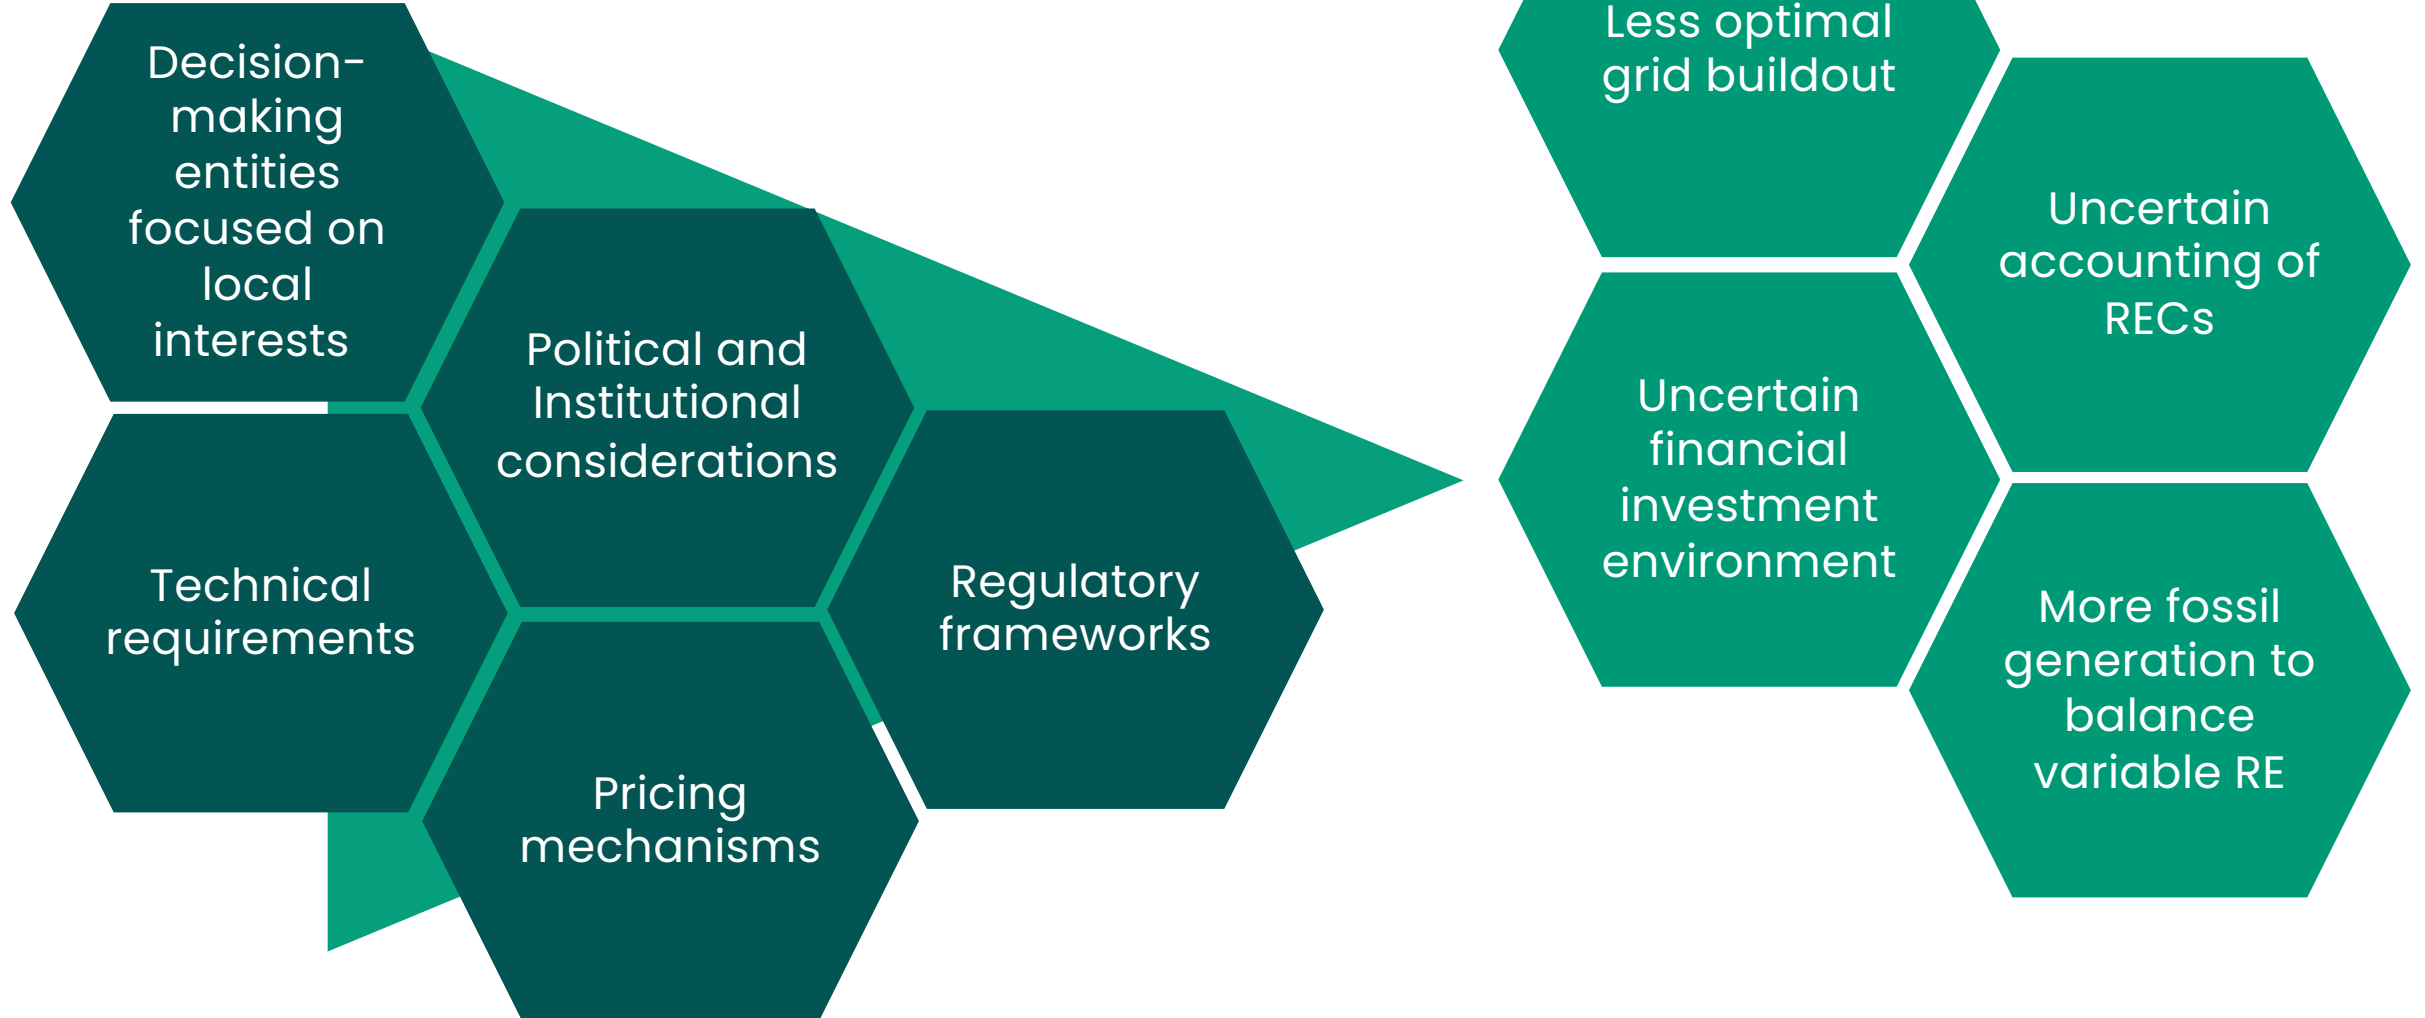

Cost-effective power system emissions reductions

Accelerating economic growth by attracting sustainability-minded business development

Barriers to APG

ACEC Supports Accelerated Implementation of the Asean Power Grid

ACEC supports a strong ASEAN Power Grid MOU that affirms Member States' commitment towards accelerating an integrated regional power network and market that can facilitate the deployment of clean energy.

In particular, ACEC would welcome the following in a renewed ASEAN Power Grid MOU:

- Formalise a regular, coordinated process for holistic planning of regional grid interconnectors;
- Prioritise grid interconnectors that enable higher penetration of renewable energy and reduce emissions in the region;
- Develop harmonised regulatory and technical frameworks that facilitate regional electricity trading and trace clean power across borders;
- Establish a regional electricity data platform for a more efficient and transparent ASEAN Power Grid;
- Recognise the essential role regulators can play to support ASEAN Power Grid development.

Thank you!
