Empowering Industrial Small and Medium Enterprises (SMEs) to boost energy efficiency

Zarmina Khan, eeaser GmbH
Industry could cut energy costs and emissions by 25% easily but fails...
Major challenges

Limited Resources
- Financial, technical, and human resource constraints

Lack of Awareness
- SMEs unaware of energy efficiency benefits and opportunities
The eeasy principle...

Data input → Algorithm → Specific actions and KPIs

Next steps:
- ...
- ...

KPIs:
- ...
- ...
A success case from the Philippines

Sector: Fabricated Metal
Total power costs: > 1 m€ /a
Solutions identified: 9
Total saving: > 50 k€
Solution examples:
- Waste heat recovery from compressors
- Adding variable frequency drives
- Central control system
- ...
Client success in Lebanon

- 2021: 3 licenses, 19% Energy Saving Identified
- 2022: 300 licenses
Aggregate information from 1000+ assessments helps to:

- Identify feasible investment opportunities
- Compare sector specific potential
- Implement evidence-based policies
Let's empower Asian SMEs together using digital solutions
